BREAKING NEWS — BUGATTI CHIRON BREAKS 300 MPH BARRIER

A near production Bugatti Chiron prototype reaches 304.773 mph for the first time. World record!

Bugatti is the first manufacturer to break the 300-mile-an-hour barrier. On a test track in Germany, a near production prototype derivative of the hyper sports car Chiron[1] surpassed the magic limit with a speed of 304.773 mph (490.484 km/h). A world record.
"What a record! We're overjoyed to be the first manufacturer ever to have achieved a speed of more than 300 miles per hour. It's a milestone for eternity. I would like to thank the whole team and driver Andy Wallace for this outstanding performance," says Stephan Winkelmann, President of Bugatti.

Further details will follow shortly.
