BUGATTI BABY II REVEALED AT BUGATTI'S 110TH ANNIVERSARY

Prototype Baby II test driven by customers at the brand's 110th anniversary in Molsheim

For the celebration of the 110th anniversary of Bugatti, a very special surprise was prepared for the enthusiasts of La Marque: the unveiling of the first Bugatti Baby II prototype. Earlier this year, the 2019 Geneva Motor Show, Bugatti had revealed the reimagining of the iconic Bugatti Baby as a 3D printed model. It captured the imagination of automotive enthusiasts around the world, and the limited edition run of 500 cars sold out completely within three weeks.
Baby II Pur Sang with a hand crafted aluminium body and 'Speed Key'

Each Baby II is 2.8m long and 1.0m wide. The exact weight of the car will depend on the version, but starts at around 230kg without driver.

RESERVE LIST

Whilst all 500 Bugatti Baby IIs sold out within three weeks of the Geneva Motor Show announcement, it is still possible for customers to join the reserve list should a prospective buyer pull out, or to get the first notification of any future models. For more details, please visit www.bugattibaby.com

Prices start at 30,000 euros (plus taxes and delivery) and production starts at the beginning of 2020. The car will be manufactured by the Little Car Company in the UK, and all 500 cars will be produced over the course of 2020 and 2021.

Notes: Final specifications to be confirmed before production commences.
